Smart metering as a service

FlowON

Smart Meters for Smart Buildings

From just 8 digits to data that makes sense to you

Get intelligence and insight on the screen that you love the most - your smartphone. You can view the per inlet consumption, history or even averages. Moreover, you can control water supply from anywhere in the world, in case of a leak. **Your first step towards water conservation and a better world for the next generation!**

A smart water metering solution for a smart you!

FlowON Water Meters are installed at every inlet point. Advanced electronics record each consumption and send it to the cloud software for billing and analysis. Moreover, installing a **FlowON** Water Meter is a simple cut and paste job – cut the pipe, paste the adaptors and fix the meter at every inlet. **100% automation in meter reading and billing brings 100% fairness and satisfaction in your apartment.**

100% Automation that works for you

The advanced platform gives you complete control over your billing process. A simple interface gives you the option to set tariff, and yes, we have thought about slabs and fixed rates too. The dashboard gives the facility managers a complete snapshot of water supply and demand, all in real time. The billing engine generates and sends bills to residents automatically. Didn't we mention that automation brings **peace of mind!**

High performance through better materials

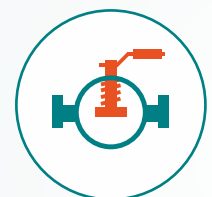

FlowON Water Meters have a unique grooved piston within the meter measuring chamber to significantly reduce meter stoppages, enhance durability and improve performance. The co-polymer resin manufactured body enables it to be used in hard water conditions without affecting its performance.

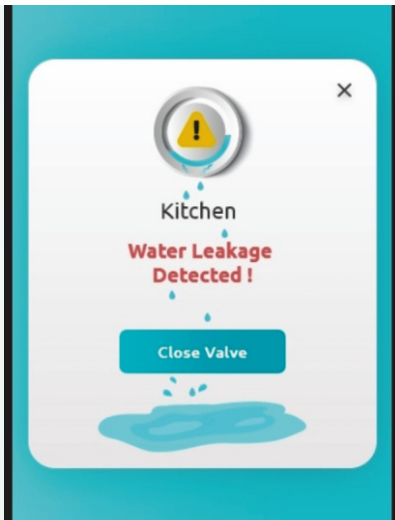

Comprehensive water management dashboard

Real-time water leakage alerts

Dependable remote operable control valve

Compliance with international standards

Available in sizes from **DN 15 to DN 25**, **FlowON** Water Meters offer brilliant performance in accordance with ISO 4064. The meters are type-tested and certified by FCRI, Palakkad, India, a globally recognised, national certifying authority.

Why **FlowON**

Metering as a service

We offer water metering as a service, assuring you of lower monthly costs and long term reliability. That's our commitment.
